

Sagard Private Credit Fund

Investor Presentation

Overview

Sagard Private Credit Fund (“the Fund”) harnesses Sagard’s institutional-calibre credit capabilities to offer Canadian investors the opportunity to participate in this attractive asset class.

The Fund invests in a broadly diversified portfolio of private credit investments, comprised mainly of floating rate, senior secured, first-lien loans originated by Sagard, together with traded and asset-based loan opportunities. In essence, the Fund makes loans to private companies, receive interest payments on those loans and then distributes the net proceeds to its investors in the form of distributions.

The Fund launched in September 2024 with over C\$50M, of which Sagard, its affiliates and employees invested C\$25M.

Monthly distributions, driving initial indicative annual net returns* of **9-10%¹**

Capital preservation & NAV stability with senior secured, first-lien priority

Inflation protection via floating-rate loans

Convenient evergreen structure with monthly subscriptions & quarterly liquidity

Currency hedged to CAD\$ to minimize foreign exchange risk

The terms and conditions set forth herein are speculative and subject to change. ¹Over the course of a full investment cycle (assuming the fund's portfolio is fully invested and stable market conditions), comprised mainly of distributions. There can be no assurance that any distributions will be made to investors. For information regarding calculation of performance information, please refer to “Performance Reporting” in the Appendix.

Why Invest in Private Credit?

What is private credit?

Broadly defined, private credit is lending by non-bank institutions. The borrower may be a public or private company that requires financing for any number of potential objectives, from funding business expansion to optimizing its balance sheet.

Generally, the borrower lacks access to traditional bank financing and/or might prefer to work with a lender who can offer more flexible terms and faster loan processing.

For the investor, private credit offers the potential for higher yield and increased protections vs. traditional fixed income, thanks to more tightly negotiated terms, covenants and pricing.

This being said, private credit covers a broad range of strategies, each offering different risk-return profiles.

Several key types of private credit include:

Senior direct lending - *Sagard's exclusive focus*

Senior secured loans made directly to middle-market companies that typically offer relatively stable spreads. Loans are 'first lien', meaning that the lender gets paid back first if the borrower gets in trouble

Junior/mezzanine debt

Subordinated loans that combine elements of debt and equity, with the expectation of higher returns than traditional senior debt

Distressed debt

Lending to insolvent or distressed borrowers, which typically involves more risk but potential for higher upside as companies are restructured

Specialty finance

Non-corporate lending in areas like equipment leasing, consumer finance, commercial real estate finance or asset-based finance

Sagard believes private credit is an attractive asset class

Private credit is one of the fastest growing private asset classes, forecast to grow to \$2.8 trillion in assets globally by 2028.* While institutional investors are allocating ~5-8% of their assets to private credit, more than half plan to increase their allocations.** The asset class can offer several core benefits, including:

Attractive Risk/Return Potential

In our view, private credit can offer returns comparable to equity benchmarks with the potential for lower downside risk

Income Via Monthly Distributions

Loans typically offer floating rate coupons, paid on a quarterly or monthly basis

Attractive Spreads Support Loan Coupons

Private credit is typically priced off a floating rate benchmark, with spreads offering a generous coupon

Focus on Capital Preservation

Senior secured, first lien priority in the capital stack, supported by robust loan covenants and intensive due diligence

Actively Managed, Diversified Portfolio

Adding private credit to a traditional portfolio of equity and fixed income can diversify returns

Sagard's robust and systematic approach to sourcing

We have access to abundant deal flow

From 800+ deals sourced/year...

We are highly selective in our investments

...to ~10 deals (~1%) closed/year

800-1,000

Sourcing

Weekly pipeline meetings to review opportunities from CEOs and management teams, advisory firms, banks, and conferences

120-150

Posting Memo

After initial review, high-potential deals are assigned to a senior credit team member who develops a posting memo for the investment committee (IC) outlining transaction, terms, and proposed diligence plan

60-80

Term Sheet

If approved by the IC, initial due diligence is completed (including identifying merits/risks and defining full diligence plan), and non-binding term sheet presented

10-15

Deep Diligence / Final IC

Once term sheet is agreed upon, Sagard credit team lead completes DD with third-party support and develops financial model; final IC memo is completed and presented for final approval by CIO

Represents illustrative pipeline for SCP I, SCP II, and SSLP I funds only

What Sagard looks for across the sourcing process

Borrowers with 2+ of these attributes...

- Market leadership and/or pricing power
- Recession resilience (e.g., excess free cash flow)
- Management alignment (e.g., major equity ownership, exit incentives)

...Sourced from our broad network

- Direct connection to borrower (e.g., relationship with management, previous borrower)
- Long-term relationship with intermediary, who usually comes from our database of 300+ channels

Overview of initial indicative portfolio

Investment Guidelines*	
North America mid-market focus	With up to 20% for ROW (targeting Western Europe & Australia)
Non-sponsor finance focus	To capitalize on market need and drive superior spreads & credit protections
60-65%	Run-rate** allocation to direct private loans
\$5-500M	Target EBITDA range
0.25%-10%	Target position size range; 2%-4% per deal on average

Portfolio Construction

The fund allocates to three major types of assets:

- **Direct private credit** originated by Sagard, including co-investments with other Sagard credit strategies, partnerships with banks, healthcare/royalty lending, and other private credit opportunities
- **Asset-based opportunities**, such as whole loans and collateralized loan obligations (CLOs) that have the potential to generate attractive yields with downside protection
- **Broadly syndicated loans (BSLs)**, to provide a degree of liquidity within the portfolio; the allocation to BSLs will be higher initially to deploy seed capital quickly and start generating returns

Run-Rate** Indicative Portfolio

While Sagard targets the portfolio above, there is no assurance that such results can be achieved. There can be no assurance that Sagard will be able to implement its investment strategy or achieve its investment objective.
 * This table outlines the initial indicative portfolio construction as it relates to the fund's investments in broadly syndicated loans only.
 ** Run-rate expected at 12 months post launch.

Why invest with Sagard

Proven Canadian firm – Sagard has an established track record as a Canada-based asset manager with over **\$27B of AUM**

Deeply rooted ecosystem – We have a strong shareholder and affiliate network, including majority ownership by the Power Corporation of Canada with **\$3.1T of AUA**

Experienced investment team – Our leadership team brings extensive experience from CPPIB, KKR, and Goldman Sachs to manage our **\$4B+** credit platform

Differentiated approach to private credit – The Fund targets higher yields via **mid-market** and **non-sponsor** opportunities often overlooked by traditional lenders

Robust deal sourcing and diligencing engine – We employ a highly selective and tailored approach to achieve greater spreads, investing in only **~1%** of the deals we consider

Strong track record - Our flagship private credit strategies are delivering between **11-13% net IRR***

* Includes Sagard Credit Partners I and Sagard Credit Partners II only, given that Sagard Senior Lending Partners I is early in its life.

Key differentiating investment targets

	Middle market focus	Non-sponsor lending focus
What it is	<ul style="list-style-type: none"> Middle market companies have annual revenues between \$10M and \$1B They are the backbone of our economy - it is estimated there are 200,000+ in the US and Canada 	<ul style="list-style-type: none"> Non-sponsored lenders work directly with borrowers (often the company founders) without an intermediary This contrasts to sponsor finance lending, where a PE firm helps facilitate the loan for the company
Why it matters	<ul style="list-style-type: none"> Middle market companies may have more complex financing needs than large companies, and often look for more flexible options to scale their business Today, we believe that there are fewer providers who service these companies; given the current environment, many lenders have moved to the upper middle market as funds have grown 	<ul style="list-style-type: none"> Post-pandemic, we see that banks have become more risk-averse; sponsor-led loans are quicker and easier, as the sponsor expedites the underwriting process As such, we believe that many entrepreneurs who are looking for flexible financing options are overlooked by traditional lenders, creating an opportunity for non-sponsor lenders
What it means for our investors	<ul style="list-style-type: none"> In our view, fewer competitors lending to these companies allows for enhanced pricing and improved downside protection (i.e., advantageous terms on first-lien loans, tighter covenants) Non-sponsored deals typically offer yields of ~1-2%* above comparable sponsored credits Our core business is the tight management of risk; we are extremely selective and take the time we need to diligence our deals and obtain the highest risk/return profile possible

Sagard has team members experienced in investing across cycles, with exposure in workouts and restructurings

Experienced in Navigating Stressed & Distressed Situations

The team has experience investing in distressed situations and achieving favourable outcomes throughout their careers.

- Adam Vigna and Mustafa Humayun have led several successful workouts and invested in various distressed situations involving restructurings during their time at Goldman Sachs Special Situations Group (“GS SSG”) and CPPIB
- Dev Gopalan invested in distressed situations (loans priced in the 70s and 80s) with Sensata and PQ, where the underwriting case envisioned a bankruptcy for both positions, but they were ultimately realized at par
- Collectively, Sagard has developed relationships with key service providers involved in these situations, including high-profile restructuring lawyers in Canada & the US, as well as restructuring advisors such as FTI, Alvarez & Marsal, Moelis, Houlihan Lokey, TD Special Situations, Rothschild, and BMO

PlyGem (at GS SSG)

Vinyl siding and window manufacturer

Invested in the company’s debt at distressed levels during financial crisis; led debt exchange negotiations and ultimately was taken out at a meaningful gain

Ally Financial / Rescap (at KKR)

Residential mortgage originator

The Rescap position was sold even dollar and moved into the Ally complex at a senior subordinated bond; Rescap recoveries resulted at 70 cents, while the Ally position realized at par

Laricina Energy (at CPPIB)

Oil sands exploration

Event of default due to missing minimum production covenant; led a restructuring that ultimately resulted in a creditor protection filing and favourable exit under CCAA

Just Energy (at Sagard)

Energy retailer

Led a recapitalization transaction in 2020 that resulted in C\$500M of face value debt being extinguished with Sagard Credit Partners having zero capital impaired

Our sourcing system

Active Pipeline

- Personal networks of SSLP and SCP
- Referrals from other Sagard strategies and the broader Sagard ecosystem
- Direct outreach to Sagard Leadership
- Long-term relationships with advisors/recurring updates
- Benefiting from strong relationships with borrowers who become references for future deal flow
- Thematic sourcing

Rigorous Monitoring & Dynamic Portfolio Management

- Monthly reporting packages from borrowers to actively monitor performance and liquidity
- Regular touch points with management to receive “real-time” business updates
- Allows for a proactive approach to predict potential covenant issues
- Utilize data from Sagard’s firm-level portfolio for sourcing and to underwrite new opportunities

Disciplined, Focused Screening

- SSLP and SCP Deal Screen
- Support from bi-weekly Sagard pipeline review
- Timely Pass/Move

Established Due Diligence Process

- Private equity style due diligence focused on identifying key drivers and risks
- Utilizing Sagard’s internal resources & advisors, as well as Sagard’s established external network
- Sagard Value Creation team considered a key resource in evaluating KPIs for each business

Deal pipeline should not be relied upon as an indicator of future deal sourcing.

Our underwriting process

The following summarizes key elements of our due diligence process:

Customer, Supplier, and Competitor Diligence

In addition to access to the PCC network, we may also use expert networks to find consultants and advisors with specific expertise in a target industry or company

Legal Review

We, along with a third-party law firm, will conduct full legal due diligence, including corporate structure review, litigation review, review of collateral, as well as analysis of organizational documents and board minutes

Quality of Earnings Reports

We will typically hire an accounting firm to analyze the reported earnings and cash flows of the potential borrower to assess any adjustments or add-backs

Projections and Cases

Based on its diligence, we will prepare base, upside and crash case (recovery analysis) financial forecasts

Review of Major Contracts

Customer, supplier, employment and other contracts/ agreements are analyzed by lawyers and the deal team to understand any potential risks

Technical Reports

In specialized industries, we will engage best in class experts to augment its own diligence

Third Party Audits

Where necessary, we will engage third party experts to conduct field audits of a potential borrower's facilities, regulatory and environmental records

References and Background Checks

We obtain competitor and character references on a potential borrower and its management team. Our team conducts background checks in respect of criminal and civil litigation history of the potential borrower and key members of the management team, along with media and other investigative checks

Our approach to risk management

Underwriting

- Private equity style due diligence approach to private credit
- Our team has expertise required to analyze complex situations that other lenders choose not to invest time into

Portfolio Construction

- Majority of deals are expected to be bespoke and direct, depending upon size of tranche and the company
- Our team is building a Monte Carlo simulation tool to assess risk at the portfolio level

Monitoring

- Investments are monitored through regular management calls, internal review meetings, and board observation rights
- Our team has a proven ability to successfully restructure underperforming credits

1 Management Calls and Meetings

Weekly ad-hoc calls with portfolio company executives to informally monitor the health of the business. Calls with management teams typically involve some or all of the original deal team, including senior members.

2 Internal Weekly, Monthly, and Quarterly Review Meetings

Weekly and monthly group meetings to discuss financial updates and strategic initiatives. On a quarterly basis, the entire investment team reviews each investment and assesses the financial health and cash flow profile of the business.

3 Board Observation Rights and Financial Reporting

As part of the credit agreement, we typically receive board observation rights. All financial reporting, board updates and any other new information received is first analyzed amongst the deal team, then discussed in real-time during our weekly calls.

Deals from Sagard's healthcare strategy may be included in SPCF

¹⁷Gross IRR is a measure of the discounted cash flows (inflows and outflows) related to an investment. Gross Portfolio IRR is based on the portfolio cash flows, including the investment amount at inception, income earned, realized proceeds and carrying value of the portfolio as of September 30, 2024. Gross performance information does not reflect inception-to-date management fees, any fund expenses borne indirectly by investors in a fund, carried interest charged by the Firm or its affiliates or, to the extent applicable, expected credit losses, which will reduce returns and in the aggregate are expected to be substantial.

¹⁸Net Fund ITD IRR represents the annualized IRR on the total Limited Partners' capital contributions, distributions, and the Fund's net asset value after management fees, fund expenses, and carried interest as of September 30, 2024. Net Fund ITD IRR incorporates the performance results of certain investors who pay no or reduced management fees and/or no or reduced carried interest, and accordingly some investors may earn lower returns than those set out herein.

Past Performance Disclaimer

Past performance contained herein is not necessarily indicative of future results and there can be no assurance that any fund referenced herein will achieve comparable results or that such fund will be able to implement its investment strategy or achieve its investment objective.

Target Returns Disclaimer

The target returns, forecasts and estimates (including, without limitation, any targeted rates of return) included herein are necessarily speculative in nature, involve elements of subjective judgment and analysis and are based upon various assumptions made by the Firm in relation to the investment strategy being pursued by the fund referenced herein. It can be expected that some or all some or all of such assumptions may prove to be incorrect or may vary significantly from actual results. Any change or inaccuracy in such assumptions will impact actual results. Accordingly actual results may differ materially from those targeted returns herein. Moreover, while the Firm generally focuses on investments that are anticipated to provide such target returns, it is not the case that every investment made will yield such returns. Target returns are hypothetical and do not reflect the actual returns of any Firm client or investor. No assurance, representation or warranty is made by any person that the target returns will be achieved and undue reliance should not be put on them.

Recycled Capital Disclaimer

The returns presented herein include all return generated by reinvested capital and profit. Without such reinvested capital, the returns presented herein could be materially lower.

Credit Facility Disclaimer

Certain funds borrow under a credit facility (sometimes referred to as a "subscription line") to make investments and pay expenses and for other purposes to the extent permitted by the fund's partnership agreement. Such fund-level borrowing to fund investments impacts net IRR calculations because net IRR is calculated based on investor cash outlays to, and returns from, the funds and as such, returns depend on the amount and timing of investor capital contributions. To the extent, a fund uses borrowed funds in advance or in lieu of calling capital, investors make correspondingly later or smaller capital contributions. Accordingly, this fund-level borrowing results in higher net IRR than if capital had been called to fund the investments, even after taking into account the associated interest expense of the borrowing.

An investment in a fund managed or advised by Sagard or an affiliate involves a significant degree of risk. There can be no assurance that the Fund will be able to generate returns for its investors or that the returns will be at the levels currently anticipated by Sagard. The success of the Fund will depend on many factors, including the ability of Sagard to identify, select, enter into and exit appropriate investments. The marketability and value of any such investment, and therefore the Fund's return on any such investment, will depend upon many factors beyond the control of the Fund or Sagard. There can be no assurance that the Fund or Sagard will correctly evaluate the nature and magnitude of the various factors that could affect the value of its investments. An investment in the Fund is subject to a number of material risks and material limitations which are discussed in the Private Placement Memorandum. Please consult the Private Placement Memorandum of the relevant Fund for further information.
